

Advance Real-time Cybersecurity

A state-of-art intelligent Secure Access Service Edge (SASE) and real-time threat prevention system. Kunai is based on Absolute Real-Time Protection WedgeARP™

Kunai’s innovative solution facilitates seamless connection and security protections of endpoints in managed networks. It addresses the security needs of all managed networks by providing comprehensive local network management functions and cloud managed security services from the ever-expanding network edge to the cloud core.

Kunai provides network connectivity management functions and real-time network-based protection for heterogeneous endpoints, suitable for cost-conscious Small Medium Enterprise, Branch Office, Retail Shops and Smart Cities.

Kunai uses Blackberry’s Threat intelligence system, the Cylance AI platform.

..Provides a multi-tenanted, orchestrated solution that provides deep packet inspection and deep content inspection ...”
